But everybody knows that the practically ununfmous demand of the American people at the time of General Grant's death was for a sepalture and a fitting monument at Washington, Everytody knows that New York, through a characteristic exhibition of impadence, succeeded in thwarting the desire of the nation, and, after using the funeral as a sort of benefit performance for the cab-drivers, rum-sellers and other classes that constitute the essence as well as John Russell, by Frances, daughter of the substance of Tammany, de-Offver Cromwell. posited the remains in a vacant | Harry Marks, once a journalist in smoke-house on the outskirts of Shantytown, and left them there, neglected, if not forgotten, for five long years. THE DISTRICT COURTS.

Their Powers as to Appointing Trustees for Property Outside the District. Editor Critic: It may not be generally known to your readers that it has been enacted by Congress by act are

proved October 1, 1899, That the courts of the District of Columold shall not have power to appoint any trustee, trustees, guardians, resolvers or other trustee of a fund or property located ourside of the District of Columbia or beconging to a corporation or person having i legal rasidence or location outside of and District. (26 St., p. 622, P. 34.)

If this language is to be taken as it stands, there has been a very serious and apparently unnecessary curtallment of the powers of our courts. If the framers of the proviso intended nothing more than that trust companies, organized under the act of October 1, 1890, should not be appointed trustees under the circumstances mentioned, the language is singularly luspt. In either view of the case the matter should be brought to the attention of Congress and the clause be repeated, or, by duplication, deprived of its authority.

Yours respectfully, Jso. S. Blats. Washington, December 10.
